PowerVault MD3 10Gb iSCSI Array Series

Designed for flexibility, the MD3 iSCSI array series support a range of drive types, enclosures and RAID levels all within a single array

Consolidate With High-performance, High-capacity Storage

Simplify the challenges of large-data storage, management and access with the high-speed PowerVault MD3 10Gb array series. The 10GbE arrays are ideal for iSCSI storage consolidation that requires high availability, high performance and business continuity without sacrificing ease of use and reliability. Designed for versatility, the array series supports a range of drive types, premium software features and a choice of 2U or high-density 4U chassis.

Spend Less Managing Your Data

The PowerVault MD3 10GbE iSCSI array series brings affordability to primary storage and allows you to add capacity and software as needed. It keeps your storage directly attached to your data infrastructure and is compatible with Microsoft® Hyper-V®, Citrix® XenServer® and VMware® ESX. In addition, the MD-series storage arrays support vSphere® Storage APIs for Storage Awareness (VASA). Simplify physical and virtual resource management with MD Storage Manager and PowerVault VMware vCenter™ Plug-In 5.0.

MD Storage Manager

With wizard-based array configuration and single-pane management, MD Storage Manager can alert you to problems and launch its recovery guru to automatically help troubleshoot and resolve issues.

Get Affordable Enterprise-level Performance

Take advantage of the enhanced features offered on all PowerVault MD3 arrays, including the latest generation of 10GbE iSCSI models.
